[WebSite](#)

Experienced Mobile Developer in native iOS and cross-platform development. Strong contributor to project design and software development, both independently and within cross-functional teams. Tech enthusiast about emerging technologies to develop effective UX solutions and achieve new challenges. My interest in mobile technology drives me beyond iOS development with Swift, SwiftUI, and Objective-C, but I've also worked with the Android environment using Java/Kotlin and cross-platform technologies such as React Native, depending on the goals to achieve.

WORK EXPERIENCE

IOS DEVELOPER

IBM | 01/25 - Currently

- Developed new features for the IBM Navigator Container project with Swift and Objective-C
- Developed iOS core framework and SDK for the project.
- CI/CD pipelines implemented to deploy new build versions on App Store
